CC AAA75166-68 encode murine TANGO 261 proteins. The specification also CC describes TANGO 266, TANGO 216, TANGO 262, and TANGO 267. The TANGO CC polypeptides can be used to modulate cellular proliferation, modulate cellular differentiation and/or modulate cellular proliferation. The CC cellular differentiation and/or modulate cellular datesion. The CC proteins can be used to treat any von Willebrand factor-associated CC disorder, regulate extracellular matrix structuring, cellular adhesion, and cellular interactions, cc modulate cell adhesion in proliferation, modulate cellular interactions, cc modulate cell adhesion in proliferative disorders, such as cancer, cc modulate the proliferation, differentiation, and/or function of cells that appear in the bone marrow, and leukocytes, treat bone marrow, blood and hematopoietic associated diseases and disorders, atelectasis, cc pulmonary congestion or oedema, emphysema, chronic bronchitis, bronchial cc asthma and bronchiectasis, intestinal disorders, spleen associated cd diseases, modulate renal disorders, treat cardiovascular disorders such as ischemic heart disease, modulate the proliferation, differentiation, cand/or function of bone and cartilage cells and to treat bone and/or cartilage associated with the ovaries, and corebral bone and/or cartilage associated with the ovaries, and cerebral cedema, hydrocephalus, brain herniations, iatrogenic disease, inflammations, cc bacterial and viral meningitis, and treat hepatic disorders. hydrocephalus and encephalitis, and treat hepatic disorders. twas created using information encoursed.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
